

## ONGO®Click, ONGO®Team and ONGO®Monitor Boards

The **ONGO®Click Boards** are light as a feather and therefore super flexible to use. With sustainability in mind, the boards have a core made of high-quality corrugated cardboard, which is covered on one side with whiteboard foil on one side and acoustically effective recycled PET fleece on the other. This results in a weight of less than 4 kg for a size of 100 x 185 cm and a thickness of approx. 16 mm.

The flexibility of the Click Boards is also enhanced by the four magnets, with which the boards can be combined in completely variable ways. Thus, they can serve as noise and privacy screens or can be quickly used for brainstorming sessions and presentations. And if only one board is needed, the **ONGO®Hold** provides excellent service - by the way, it can also be used as a stool if no ONGO® stool is available.

The **ONGO®Team Boards** can be used as a whiteboard on one side and as a pinboard on the other. With four lockable castors, they can be easily and flexibly rolled to their desired location, and up to six Click Boards can be carried on the base. Also there is space for utensils, such as pens, board wipers, needles, etc. Below the handles, a support is provided on both sides, on which a Click Board can also be placed horizontally. This creates a situation like a blackboard, i.e. space in abundance. The Team Boards measure 195 cm x 115 cm, their carrier plate is made of 19.6 mm multiplex covered with white HPL as a whiteboard and laminated on one side with 9 mm thick, acoustically effective and recycled PET fleece as a pinboard. Furthermore, 8 magnets are part of the equipment for the variable connection.

The **ONGO®Monitor Boards** differ from the Team Boards in that they are additionally equipped for the installation of a screen on the side with the acoustically effective fleece: with a holder, a slot as a cable channel and a box as storage space. The back of these boards can also be used as a white board and as a holder for Click Boards. In this way, a video conference can be transformed into a brainstorming session in a flash, or vice versa.

## Product specifications

### ONGO® Click Board

- Dimensions: approx. 185x100x5,5 cm
- One side coated with whiteboard film, the other with PET felt
- Four magnets
- 1 package contains 3 Click Boards and 4 connecting clips
- Weight: approx.: 3,7 kg/Board

### ONGO® Team Board

- Dimensions: approx. 195x40x115 cm
- One side coated with PET felt, the other with HPL (white)
- Foot: Multiplex white with 4 lockable double castors for hard and soft floors
- Delivery fully assembled
- 3 years warranty

### ONGO® Monitor Board

- Like ONGO Team Board
- Additional material box
- Dimensions: approx 195x45x115 cm
- Weight approx. 35 kg
- Delivery fully assembled
- 3 years warranty

## Material

- Click Board: triple-layered corrugated cardboard
- Team/Monitor Board: plywood sheet, coated with PET felt (gray) and HPL sheet (white)
- Foot in Multiplex white
- Magnets: plastic/steel
- Castors in plastic, white
- Box: metal, white, cover multiplex white
- Weight approx. 55 kg
